

QuickLicense

Software License Protection and Management

Billions in revenue are lost each year due to unauthorized software use. Software is often used without a paid license. Most in-house security schemes are easily defeated by a hacker with a disassembler and a devious mind. There's a cottage industry of tools, blogs, cracked applications and step-by-step tutorials to rob your investment.

QuickLicense combines protection, flexibility and user convenience to manage any software license. Change licensing strategies with a few mouse clicks and minimal or no programming.

Quick

- Cut Time to Market with Quick and Easy Implementation
- Change License Options with Minimal or No Programming

Secure

- Provide Secure Licensing on Windows or Mac OS X
- Protect Against Hackers and Detect License Violations
- Get Many Nested Layers of License Security
- Securely Block, Release or Reset an Activated License
- Enable or Disable Paid Features in an Activated License

Flexible

- Facilitate Shrink-wrapped, Electronic or Time-Leased Distribution
- License any Consumer, Business or Shareware Application
- Use with Applications Written in any Programming Language
- Protect Spreadsheets, Plugins and Multimedia Content
- Create Machine or Name Specific Licenses

Powerful

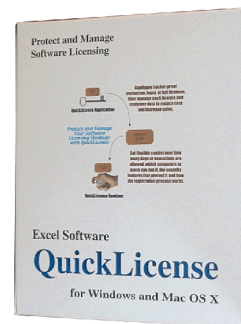

- Limit Application Use By Time or Executions
- Require Online Activation Directed to Your Specified URL
- Restrict Activated License to a Specific Computer or Number of Users
- Control Reactivation of Expired Licenses
- Automate Monthly, Quarterly or Annual Subscriptions

Customer-Focused

- Present Customers with an Automated Activation Process
- Protect Applications on Computers without Internet Access
- Present Days Remaining or Execution Count to Entice Users to Buy
- Control User Interface with Custom Text and Multiple Languages

Economical

- Deploy Licenses for any Product, Platform or Edition Royalty-Free
- Build and Manage Licenses for or from Windows or Mac OS X
- Reduce Distribution Cost and Customer Support with Automation
- Collect, Locate, Organize and Manage Customer Data
- Export Customer Data to Spreadsheets, Databases or MarketBuddy

Create time or execution limited Trial editions of commercial or shareware products. Get unlimited royalty-free deployment for all your Mac and Windows applications.

Automate online activation and license Reset, Block and Unblock options. Limit access to specific machines, users or paid features. Customize for any language.

Collect customer data during the activation process. Use that data to manage, search and organize licenses. Import data without typing or export to databases, spreadsheets or MarketBuddy for sales automation.

Send template driven email for Activation, Reset or Subscription Codes or new product announcements.

Use AddLicense to protect compiled applications with simple drag and drop. Customize for any language, apply any license or build a Try/Buy product without programming.
